

TRAN PHI THANG

Backend Developer

Birthdate: 27/11/2004

Gender: Male

Phone: 0704543667

Email: pthngws@gmail.com

Address: Tan Binh, Ho Chi Minh City

OBJECTIVE

My short-term goal is to deepen my programming skills and master current technologies to become a proficient software developer. My long-term goal is to broaden my knowledge across areas like frontend, AI, DevOps, and software architecture, building a strong foundation to adapt, innovate, and contribute effectively in diverse environments.

EDUCATION

Ho Chi Minh City University of Technology and Education

- GPA: 3.54/4.0
- Major: Information Technology

Expected Graduation: June 2026
2022 – Current

WORK EXPERIENCE

THL ONE

6/2025 – 9/2025

R&D Internship

Designed and implemented an AI Agent for automating task tracking and report management, combining n8n workflows with RAG to improve efficiency and accuracy.

Developed a Next.js corporate landing page with SEO best practices, integrating content dynamically via Strapi API, resulting in improved web visibility and streamlined content management for the organization

SKILLS

Programming Language

Java, JavaScript.

Database

PostgreSQL, MySQL, MongoDB, SQL Server

Backend

Spring Boot, Express.js, Nest.js

Frontend

React.js, HTML/CSS, Tailwind, Bootstrap

Soft Skills

Problem-solving, Time management

CERTIFICATIONS

TOEIC 825 L&R

PROJECTS

Internal Enterprise Management System

08/2025 – Present

Team size: 2

Architecture: Microservices

Technologies: Spring Boot, Spring Security, Spring Cloud, STOMP WebSocket, PostgreSQL, MongoDB, MinIO, Swagger/OpenAPI, Docker, React, FastAPI, LangChain, FAISS

Features: JWT auth with roles/permissions and refresh tokens, users/departments management, projects/tasks CRUD and assignment, document upload/sharing on S3-compatible storage, real-time chat (reply, typing, reactions, pin, delete) via WebSocket, in app notifications; AI RAG chatbot (LangChain + FAISS) integrated across services.
